Lab #4
October 26, 2024

Overview

On October 26, 2024, Detective Angela Lansbury, acting director of the UNCC forensics lab, requested an analysis of a Chat App database extracted from the phone of Rett Haring, a known "goon for hire" involved in criminal activities. The database was acquired through the UNCC SIS's Mobile Electronics Technical Analysis Lab (METAL), but it could not be parsed by their tools. The goal of this investigation is to analyze Rett's communications, identify his contacts, and uncover details about his activities.

Exam Preparation

The examination environment used is a HP Laptop running Microsoft Windows 11 Home Version 10.0.22631. The tool used for analyzing communications and contact information is SQLite Studio Version 3.2.1.

Analysis

1. What was the date of contact for the user who replied "Nu phone who dis".

The date of contact of the user who replied "Nu phone who dis" is **May 8, 2020 at 10:13:43 PM**. This can be seen in the date column of the message in SQLite below:

The screenshot shows the SQLite Studio interface with three fields: 'text (TEXT)', 'read (NUMERIC)', and 'date (INTEGER)'. The 'text' field contains 'Nu phone who dis?'. The 'read' field contains '0'. The 'date' field contains '2020-05-08 22:13:43'. Below the date field, a calendar for May 2020 is displayed, with the date May 8, 2020, highlighted.

	Sun	Mon	Tue	Wed	Thu	Fri	Sat
18	26	27	28	29	30	1	2
19	3	4	5	6	7	8	9
20	10	11	12	13	14	15	16
21	17	18	19	20	21	22	23
22	24	25	26	27	28	29	30
23	31	1	2	3	4	5	6

Figure 1: Date Column of the Message in SQLite

2. Which users (by their email address) were involved in that conversation?

The email address of the users involved in that conversation is **rett.harring@outlook.com** and **kamoze@chattymail.com**. Users #0 (Rett) and #5 (Kamoze) were involved and the emails provided are associated with those users. This was found by seeing the users who received and responded to the message thread.

		Chat_ID	recip	auth	thread_ID	text
		5	5	0	3	Nu phone who dis?
Contact_	Cnum	Cnick	Clast	Calt	Cavatar	Cfirst

3. What does Ms. Loeb look like?

Looking through the user information in the contacts table of SQLite I was able to find **Ms. Loeb's image which is provided below:**

Figure 3: Image of Ms. Loeb

4. What is the item that appears to have been stolen and when was the message sent?

The item that appears to have been stolen is a **gold inlaid guitar pick**. The message regarding the stolen item was sent on **May 4, 2020 at 3:50:03 PM**. This message and the date it was sent were found using SQLite and can be seen below:

text (TEXT) ☐ Null value	
Text	Hex
Hey Rett, I am missing a gold inlaid guitar pick. You didn't happen to see one?	

read (NUMERIC) ☐ Null value	
Number	Text
1	

date (INTEGER) ☐ Null value

Conclusion

The forensic analysis of Rett Harring's communications in the ChattyMcChatFace database provided critical information regarding his contacts and communications. Key discoveries include the date of contact for specific conversations, list of involved users, and evidence of stolen items. Frequent communications with a specific contact have also been identified, along with a secret message. These findings will aid in further investigation of Rett Harring's activities.
